

Screenshots are in the same order as in your Wireframe file.

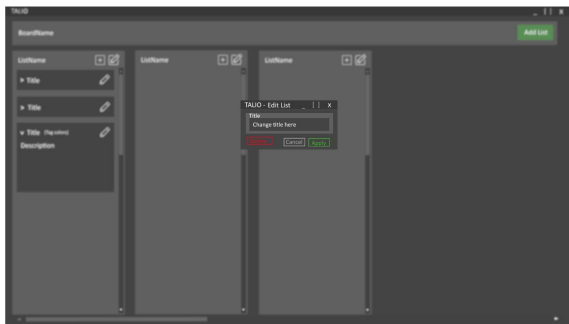

Frame - description, name, or screenshot	Feedback - heuristic + description
	<p>8 - good minimalistic design, but how admin would be able to sign in? Also, what will appear if the server address is incorrect?</p>
	<p>7 - a bit not enough contrast and a variety of colours. So, for example, if the Title is long enough, it will conflict with the pencil icon. Also, the scrollbar is almost the same colour as the list bg.</p>
	<p>8 - not enough information on what will happen with the task with opened description if we try to drag it.</p>
	<p>5 - I think the red colour of the delete button and the dark grey background are not combining well. Try to find a different shade of colour or change the colour. Also, don't understand why you need these three buttons “_ [] X” on the right of “TALIO - Edit Card”. Moreover, no information on how to change the description and add/remove tags.</p>
	<p>10 - just ok</p>

6 - Don't understand why you need these three buttons “_ [] X” on the right of “TALIO - Add Card”. Moreover, no information on how to add descriptions and tags.

7 - Don't understand why you need these three buttons “_ [] X” on the right of “TALIO - Add List”. Also, not sure about the size of the scrollbar and the length of the list. Is it fixed or not?

7 - I think the red colour of the delete button and the dark grey background are not combining well. Try to find a different shade of colour or change the colour. Also, don't understand why you need these three buttons “_ [] X” on the right of “TALIO - Edit List”.

Are you sure you want to delete this list?
