Board overview	Heuristic 3 - It's unclear how can I add a description to a card. Why do some cards have a description and others don't? The edit card views have no text box for adding the description. It should be either added or the user should have the option to edit the description text directly from the board view.
Edit Card/Edit List	
Add Card/Add List	Heuristic 1 - It's unclear what will happen when the user doesn't fill in the name of a card/list. The dialogue says "Type title here" but if I click on apply I don't know what will appear as the name of the card/list. It should be either impossible to click on apply before inputting a value or a default value should be displayed instead of "Type title here"
